

# International Federation of Environmental Health

## **Statement by the President of the IFEH**

On behalf of the International Federation of Environmental Health, I would like to extend our sympathies to the New Zealand people who suffered loss of life and destruction caused by the recent devastating earthquake in Christchurch. This disaster places the people of Christchurch at a risk to further damage from aftershocks and new environmental risks from damaged hazardous undertakings required to clear devastated areas. We are deeply saddened by the loss of life and devastation caused by this earthquake and we will support the relief effort in any way we can. Our thoughts and prayers continue to be with you. We wish the people of Christchurch a speedy recovery and the return to a new normalcy.

Robert Bradbury  
President
