

International Federation of Environmental Health

Statement by the President of the IFEH

On behalf of the International Federation of Environmental Health I would like to extend my sympathy to the Haitian people who are suffering loss of life and destruction caused by the recent devastating earthquake near the island capital, Port-au-Prince.

This disaster places the people of Haiti at greater risk of disease in addition to significant environmental risks from damaged hazardous undertakings.

We are deeply saddened by the loss of life and devastation caused by the earthquake and we will support the worldwide relief effort in any we can.

Bernard Forteath
President
