The Research Institute for Health Sciences and Environment, in collaboration with the Iranian Association of Environmental Health and the School of Public Health and Safety at Shahid Beheshti University of Medical Sciences, held a national event by inviting all faculty members, personnel, students, and officials in environmental health to celebrate “World Environmental Health Day” on October 1, 2024, at Shahid Rahimi Hall, Shahid Beheshti University of Medical Sciences in Tehran.

The event was a symposium focused on the theme for the year 2024 titled “Environmental Health: Creating Resilient Communities through Disaster Risk Reduction and Climate Change Mitigation and Adaptation,” featuring six scientific presentations:

- 1- **The State of Environmental Health in the Country: Challenges and Solutions** by Dr. Anoushirvan Mohseni-Bandpei, the esteemed Dean of the Research Institute for Health Sciences and Environment and the Iranian Association of Environmental Health.
- 2- **Social Health and Climate Change** by Dr. Farhad Nosratinejad, esteemed faculty member of the University of Rehabilitation and Social Health.
- 3- **Crisis Conditions in Iran and the Impact of Climate Change on Them** by Dr. Mohammad Hassan Naami, esteemed Deputy Minister of the Interior and Head of the National Crisis Management Organization.
- 4- **An Overview of Climate Change and Contributions of Environmental Health in This Area** by Dr. Sedigheh Torabi, esteemed Deputy of Human Environment at the Environmental Protection Organization
- 5- **The Role of Management in Environmental Health** by Dr. Mohammad Esmail Motlagh, respected Secretary of the Supreme Council of Health and Food Safety.
- 6- **The Significant Impacts of Climate Change on Public Health** by Dr. Jafar Jandaghi, esteemed Head of the Occupational Health and Environment Center at the Ministry of Health and Medical Education.

The event brought together over 250 students, faculty members, experts, professors, and officials to discuss the critical link between a healthy environment and human health, as well as to explore ways to address challenges posed by disasters and climate change. The symposium provided a platform for participants to exchange ideas and share their experiences in promoting environmental sustainability and protecting public health from climate change impacts.
